

Anleitung: High Sierra auf HP Elitebook 8460p mit Intel Core i7-2620M und ATI HD 6470M

Beitrag von „ssprod“ vom 3. Oktober 2018, 01:37

Thank you. I've generated a patched SSDT for my CPU, and as advised, updated Clover, kexts, replacing IGF with Whatever Green. Shutdown is still not successful.

UPDATE! Unplugged any peripherals (included mouse) in the 2 x USB ports left side and the issue is rectified. USB port right side functions without issue. Any thoughts would be welcomed and appreciated. Thank you!
