## macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „mosconijr“ vom 14. Oktober 2018, 14:31

@[kuckkuck](#)

For me, iGPU HD4600 on Z97MD3H, work out of the box with your rom

Added only Lilu + Whatevergreen + AppleAlc for hdmi audio and fix some crashes when video popped out on Safari.

now rok solid without any headache...
