DarBoot - APFS Booteinträge mit Ozmosis

Beitrag von „MrVanosh“ vom 21. Oktober 2018, 11:21

I did it again to show logs and F8 (boot

It's weird because DarBoot finds this boot.efi and says it adding on boot menu but without result 🤔 And with BootMenu it shows this partitions to boot(Preboot, Macintosh SSD, Recovery) but when select one of them it says not found like on screen in post above.
