DarBoot - APFS Booteinträge mit Ozmosis

Beitrag von „MrVanosh“ vom 21. Oktober 2018, 21:23

[kuckkuck](#) I check boot order in BIOS and nothing is added to it. In Defaults.plist DisableBootEntriesFilter is set to false, I will check in few minutes if changing to true changes something. Yes I have AppleBootPolicy in my ROM (DarBoot.log says it too)

Edit: Ah with Enabled DisableBootEntriesFilter works well 😄
