## Asus Z9PE-W8 USB3 funktioniert nicht

Beitrag von „al6042“ vom 3. November 2018, 12:11

Hi [boolean](#) and welcome to the forum... 😊

We upgraded our forum to an newer version three weeks ago.

Some of the older posts still use the old links, which do not work anymore.

In your case the missing link should point to the [GenericUSBXHCI.kext](#), which was Rehabmans invention in 2014.
