## OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „sinopan“ vom 14. November 2018, 19:08

[kuckkuck](#)

thanks for your help.

in boot menu there is just two boot options with the same name: mac osx, and either of them boots when set as the first priority, but both works normally when I press F12 to choose any one of them to boot.

and I tried the [DarBoot.plist](#) to my efi folder, but it still can not boot.

and in defaults the user interface is already fal.

could you please help me check my rom, thanks sincerely.
