

Erledigt

Sierra auf einem Asus X52J

Beitrag von „Evenaar“ vom 18. November 2018, 20:00

[derHackfan](#) oh, dann war das noch vom Anfang wo ich einfach mal probiert hatte. hab den in der aktuellen Fei nicht mehr drin, aber dennoch gibts kein Weiterkommen beim Hackbook.

Vielen Dank euch beiden trotzdem schonmal, ich würde mir den Thread heute Nachmittag/Abend mal anschauen, da ich dann erstmal noch bisschen was mit meiner kleinen Familie unternehme 😊

Und ich würde mich melden, wenn ich ne Hand brauche die mich führt 😊

Edit:

Hab das ganz jetzt mal versucht so gut es geht nach der Anleitung umzusetzen, aber weder konnte ich mir El Kapitän noch Yosemite runterladen und habe somit Sierra genommen und wir in der Anleitung beschrieben nochmal neu auf meine externe Hdd gezogen. Nun bin ich aber beim booten dieser an folgender stelle hängen geblieben (mit -verbose)

```
