Yes...

Works like a charm...

Thank you very much for your help..

Sir, if you don't mind, I would like to ask for another problem.

When I was on Sierra, I managed to make dual boot (Sierra and Windows 7). Any idea how to make it works on Mojave?

And 1 more, I changed my wifi card to Atheros AR5B95 and it works on Sierra with kext, and I tried with the same kext on Mojave but didn't work. Any idea?

Thank you...
