## **ASRock Z390 Phantom Gaming itx/ac erste Erfahrungen**

**Beitrag von „Slider“ vom 22. November 2018, 06:19**

[Brumbaer](#) Thank you!

It helped a lot and I manage to have the iGpu running with the Fake Id 😊

I compile and used the latest AppleALC and the audio is working!

I'll now try to make the sleep and power off to work properly.

Thank again !
