OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „jormcken“ vom 28. November 2018, 04:30

I am having issues with Ozmosis 167X-XMAX on my GA-H77N-WIFI running i5 3570k with only the IGP I can get Mojave installed but it fails to boot into the OS after install. I don't know I may just be doing something wrong my High Sierra installion still boots though. I would really appreciate the help if you have the time.

1. Hersteller: Gigabyte
2. Modell: GA-H77N-WIFI
3. Chipsatz: Intel[®] H77 Express
4. Bios Version: F4
5. Bios Link: http://download.gigabyte.eu/FileList/BIOS/mb_bios_ga-h77n-wifi_f4.exe
6. macOS Mojave
