

Intel NUC - Bean Canyon - NUC8i7BEH

Beitrag von „optim2004“ vom 1. Dezember 2018, 06:32

Hello, [Patricksworld](#)

Thank you for the files - i installed macos to NUC8i7BEH and run vey well!

About Bluetooth - intel WLAN/Bluetooth card in NUC don't have firmware and install this firmware every boot at start in Windows

If you start windows and after start macos (IMPORTANT - only without manual switch off energy) - bluetooth working fine

bluetooth Rehabman kext patch **only for Broadcom cards**

I bought usb bluetooth BCM20702A0 chip and work very well with Magic Mouse after install Rehabman Bluetooth patch

link <https://www.citilink.ru/catalog/quipment/netcards/341953/> - maybe you will find same in Germany

I hope the information will help you
