

Erledigt GeForce GTX 1060 Spinnt

Beitrag von „rubenszy“ vom 6. Dezember 2018, 20:31

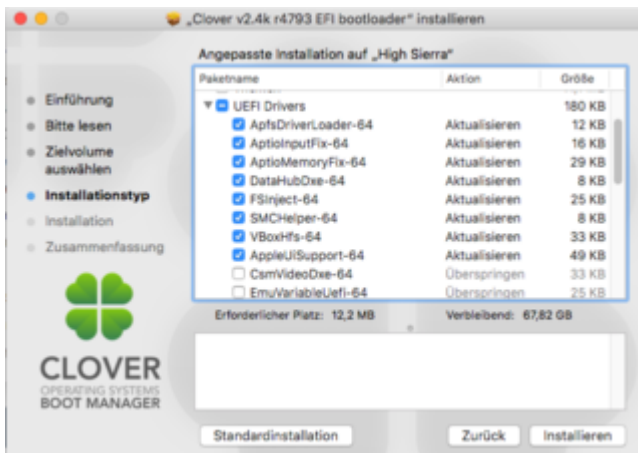

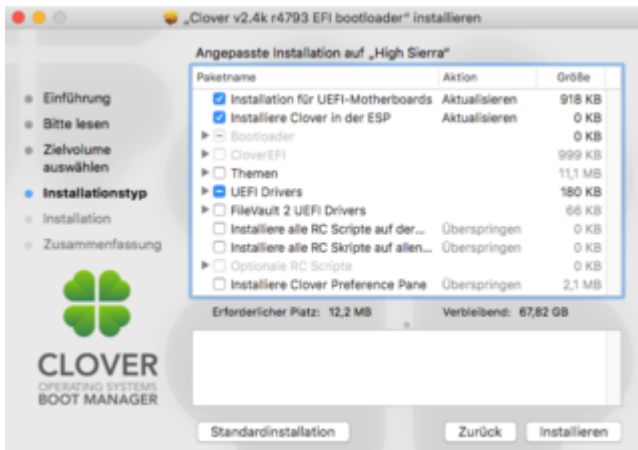

Er kann doch mit dem Tomatentool arbeiten, nur halt richtig.

Dazu lädst dir noch Clover <https://sourceforge.net/projects/cloverefiboot/>

Zum ende noch den Webtreiber <https://www.nvidia.de/Download/driverResults.aspx/139590/de>
 Mehr braucht man nicht machen.
