TINU - Der einfachste Weg zum USB-Installer

Beitrag von „ITzTravellnTime“ vom 9. Dezember 2018, 17:55

Hi, I have published a new version of TINU, with a lot of improvements based on all the user's complains in the last months. This is a short changelog:

- Huge changes and reworking under the hood
- Moved to xCode 10
- Mojave dark mode support
- New EFI Partition Mounter utility
- New redesigned log window
- Improved grammar, text and understandability
- improved layouts and UI
- New login and password prompt system, more secure and reliable
- Huge bug fix (thanks to the users and beta testers)
- Optimization of the app
- Re-organization of the source code
- Added new people to the credits (Peter Paul Chato, Thomas Tempelmann)

You can find it here:
