## WhateverGreen

**Beitrag von „Politic“ vom 10. Dezember 2018, 19:18**

Thank you for your response.

I installed the next IntelGraphicsFixup v1.2.7. No change, so for the HD530 graphics card, I do not see why to install WhateverGreen.

For CMMChris, the SSD has a Crucial MX300 and the start is the same when the TRIM is off or on.
