

# Intel NUC - Bean Canyon - NUC8i7BEH

**Beitrag von „sarkdavidson“ vom 29. Dezember 2018, 00:07**

@ [Patrick World](#) Hey Patrick! With your EFI, Mojave seems to work on my NUC8i7BEH. I wonder if you have some rendering in Final Cut Pro? It will definitely crash when it starts to render in the background or export videos. Also, ethernet does not work on my build, DPCIManager snapshots attached. With "Efinuc8.zip", the ethernet works though, so I would like to know how to fix it. Thanks.
