Genau, siehe DVXAChecker HD3000 :

The screenshot shows the DXVA Checker application window. The title bar reads "DXVA Checker". Below the title bar are four tabs: "Decoder Device", "Processor Device", "DXVA-HD", and "Trace Log". The "Decoder Device" tab is selected. The main content area displays a list of supported decoder devices for the "Intel(R) HD Graphics Family". Each row contains the decoder device name, the DXVA version, the NV12 support status, and the supported resolution ranges.
