AORUS PRO Z390, i9 9900K, Radeon Vega56 - Reboot nach dem erstem Login nach der Installation

Beitrag von „nhasan77“ vom 12. Januar 2019, 17:10

I reply this in English.

I have just built a similar configuration: AORUS PRO Z390 + i9 9900K + GIGABYTE VEGA 64

Have you done some overclocking on the CPU? I had the same reboot after login when I set the CPU core voltage to 1.32. I then reset it back to Auto and since then there are no more crashes.
