## **AORUS PRO Z390, i9 9900K, Radeon Vega56 - Reboot nach dem erstem Login nach der Installation**

**Beitrag von „Beppo68“ vom 12. Januar 2019, 17:51**

Thank you.

I've now changed internal GPU to Auto and get an direct reboot just before the login screen should appear...

When I was able to login, some minutes before - my vega56 grew louder and louder from second to second... Just after login you can't hear the fans and a minute later the fan was rotating at max... It's all very strange.
