AORUS PRO Z390, i9 9900K, Radeon Vega56 - Reboot nach dem erstem Login nach der Installation

Beitrag von „nhasan77“ vom 12. Januar 2019, 18:00

Have you tried to reset the BIOS with Load default settings and then boot the system?

If that does not work then try to apply the following settings:

Check if the [BIOS settings](#) conform to the below:

Change [BIOS Settings](#)

- Save & Exit → **Load Optimized Defaults**
- BIOS → Fast Boot : **Disabled**
- BIOS → LAN PXE Boot Option ROM : **Disabled**
- BIOS → Storage Boot Option Control : **UEFI**
- Peripherals → Trusted Computing → Security Device Support : **Disable**
- Peripherals → Network Stack Configuration → Network Stack : **Disabled**
- Peripherals → USB Configuration → Legacy USB Support : **Auto**
- Peripherals → USB Configuration → XHCI Hand-off : **Enabled**
- Chipset → Vt-d : **Disabled (Important for overclock)**
- Chipset → Wake on LAN Enable : **Disabled**
- Chipset → IOAPIC 24-119 Entries : **Enabled**
