## **AORUS PRO Z390, i9 9900K, Radeon Vega56 - Reboot nach dem erstem Login nach der Installation**

**Beitrag von „Beppo68“ vom 13. Januar 2019, 11:09**

[@nhasan77](#) your iMessage problem might have something to do with the fact that you don't have a EmuVariableUefi-64.efi driver installed (no NVRAM)

You can try to add the EmuVariableUefi-64.efi and also install the RC scripts in the Clover installation. And use the slide=0 flag in the boot section.
