## Dell inspiron 5370

**Beitrag von „Harper Lewis“ vom 30. Januar 2019, 20:12**

It looks like your hardware is/or settings are slightly different. TPD0 → name is <"MSFT0001"> on my laptop vs. <DELL0810> on yours. There is an option to change the device:

Spoiler anzeigen

Can you please boot into UEFI Shell and find out what setup\_var 0x26D shows? This will not change anything, it just shows the value of 0x26D.
