

# iStat Menus - von Store Version auf Webversion updaten?

Beitrag von „sunraid“ vom 20. Februar 2019, 20:02

[b33st polaplex](#)

The Mac App Store version of iStat Menus is a little different to the version you can purchase and download from our website.

- It currently does not contain weather information.
- It can not control fan speeds.
- It can not show CPU frequency.
- The [iStat Menus Helper](#) is needed to view some stats.

Apart from those things, it's the full iStat Menus.
