asus gl553vd

Beitrag von „mt-fr“ vom 4. März 2019, 22:57

HI

[anonymous_writer](#)

after many time I'm come to work agin on this laptop .

Today I installed Mac OS 10.14.3 and use last clover file
<https://github.com/Mohammadtag...jave-For-Asus-ROG-GL553VD>

but touchpad doesn't worked !!! I checked it but I can't fixed it .

I deleted the AppleIntelLpssl2CController.kext + AppleIntelLpssl2C.kext in S/L/E

and did

```
sudo touch /System/Library/Extensions/ && sudo kextcache -u/
```

```
sudo kextcache -i /
```

and tested i2c kext on s/l/e (VoodooI2C.kext + VoodooI2CHID.kext)

but but but doesn't worked

I get IORegistryExplorer for checking . please check it and help please . thank you .

```
sudo touch /System/Library/Extensions/ && sudo kextcache =>
```

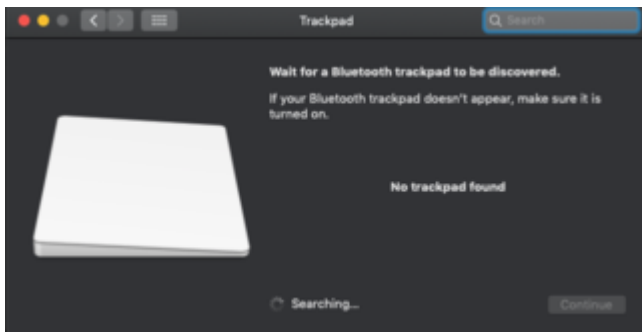

```
AppleHPM.kext - dependency 'com.apple.driver.AppleIntelLpssl2CController' not found.
```

```
AppleHPM.kext is missing dependencies (including anyway; dependencies may be available from elsewhere)
```

```

update March 5 2019

HI

today I used origin DSDT.aml and I patch it with

```

# Patch to fix ELAN1200 _DSM method to make it work with VoodooI2C
into method label _DSM parent_label TPD0 remove_entry;
into device label TPD0 insert
begin
\n
Method (_DSM, 4, Serialized) // _DSM: Device-Specific Method ELAN1200 \n
{
\n
If (LEqual (Arg0, HIDG))\n
{
\n
Return (HIDD (Arg0, Arg1, Arg2, Arg3, HID2))\n

```

```

}\n
\n
If (LEqual (Arg0, TP7G))\n
{\n
Return (TP7D (Arg0, Arg1, Arg2, Arg3, SFBF, SBFG))\n
}\n
\n
Return (Buffer (One))\n
{\n
0x00 \n
})\n
}\n
end;

```

+

```
# Windows 10 DSDT Patch for VoodooI2C
```

```
# Allows I2C controllers and devices to be discovered by OS X.
```

```
# Based off patches written by RehabMan
```

```
into_all method code_regex If\s+([\s]?_OSI\s+(\("Windows\s2015\s"\)\s)\s)
replace_matched begin If(LOr(_OSI("Darwin"),_OSI("Windows 2015"))) end;
```

when booted system with new DSDT.aml file , touchpad worked good but when I tested these patching code for last edit by you , doesn't worked.

I got IORegistryExplorer file when I booted system with new DSDT.aml (working touchpad) for checking .

[Zitat von anonymous writer](#)

This two files should get work Apple Intel Thermal Subsystem and Intel SMBus Controller .

Intel Gaussian Mixture Mode > Does this device also exist for OSX and when yes which

driver will be load?

If you can answer this question I can connect the device with the OSX device driver.

Fan > No Device ID, therefore unfortunately no possibility to integrate this in OSX.
Sorry.
