Hi [mt-fr](#) ,

Maybe it would be better if we try to eliminate the patched DSDT.aml. Please delete DSDT.aml and add the attached file to "/CLOVER/ACPI/patched".

The developer of VoodooI2C.kext + VoodooI2CHID.kext recommends to install this files to "/CLOVER/kexts/Other". Only from "/CLOVER/kexts/Other" this kext's should work properly.
