OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „Markzhang“ vom 11. März 2019, 14:36

[Zitat von kuckkuck](#)

[Markzhang](#) I created a very small Ozmosis ROM for you. Only basic Ozmosis Support with the most needed modules is integrated. Try on your own risk: [Mod für GA-B85M-D3H](#)

[helmett](#) There's already a ROM for your Ga-Z97X-UD7 TH available in our Download-Section, I added the F7a BetaBIOS Version. I don't know that Beta ROM, please use it on your own risk: [Ozmosis Mod für Z97X-UD7TH](#)

Thank you very much for your help. I use the firmware you made, but I can't install the boot mojave. Maybe the firmware doesn't support APFS. I also use a lot of firmware in the forum, there is a black screen, and I can't boot the mojave system. I did not use an external graphics card, use the core display of i5 4600, I hope to get help again, thank you!
