Heikos-iMac-Pro:~ heiko$ /Users/heiko/Downloads/VDADecoderChecker ; exit;
An error was returned by the decoder layer. This may happen for example because
of bitstream/data errors during a decode operation. This error may also be retur
ned from VDADecoderCreate when hardware decoder resources are available on the s
ystem but currently in use by another process.
VDADecoderCreate failed. err: -12473
