

Erledigt

Ein Patch für das Vorschau Problem in Mojave

Beitrag von „CMMChris“ vom 12. April 2019, 11:43

Und wer die genaue Ursache wissen will, der schaut sich unter /System/Library/PrivateFrameworks die AppleVPA an. In deren info.plist findet man das:

Code

```
1. <key>System Support</key>

Alles anzeigen

Passt das genutzte SMBIOS nicht zur vorhandenen Grafikhardware, funktioniert deshalb die Vorschau nicht mehr. Gleiches Spiel wie bei der AppleGVA welche fürs Hardware Encoding und DRM zuständig ist.
