Matebook 13 [i7 8565U, 8GB RAM, Intel® UHD Graphics 620] - schaffe es nicht in den Installer

Beitrag von „Technotron“ vom 3. Mai 2019, 16:22

Does the trackpad work? Did you have to add kext and/or efi files?

You said you booted from usb, did you try adding the efi folder to your Matebook drive?

[yoqueco](#) : when I chose "config_installer.plist" from the linked GitHub, I end up with the screen turned off before I reach the installer. Did you fix that somehow?
