[English] I need some help with Mojave and Z77X-UD5H and Ozmosis. This is the best place, but I don't speak German. Can anyone help?

Beitrag von „colourofsound“ vom 10. Mai 2019, 11:23

I'm back! Basically having the same issue, but with Mojave. I've installed the latest Oz BIOS from the Z77X-UDH5 thread, but am still getting the firmware issue.

Whats the best course of action? Thanks!
