

Erledigt

Wacom Intuos S funktioniert nicht nach dem Aufwachen

Beitrag von „mabam“ vom 11. Mai 2019, 13:38

Mit

`ioreg -w 0 | grep EC` lande ich beim `AppleIntelMEClientController`, aber den wirst du wohl nicht meinen.

`ioreg -w 0 | grep USBX` wirft das aus:

Code

1. | | | +-o XHC@14000000 <class AppleIntelCNLUSBXHCI, id 0x1000002b4, registered, matched, active, busy 0 (100 ms), retain 136>
2. | | +-o AppleUSBXHCI@14000000 <class AppleUSBController, id 0x100000319, registered, matched, active, busy 0 (1 ms), retain 13>
3. | | +-o AppleUSBXHCI Root Hub Simulation@14000000 <class AppleUSBRootHubDevice, id 0x10000031a, registered, matched, active, busy 0 (0 ms), retain 13>

Das führt mich zu diesen anderen Eingaben:

```
1) $ ioreg -w 0 -rc AppleIntelCNLUSBXHCI (da ist der Intuos S unter der Zeile +-o HS09@14900000 <class AppleUSB20XHCIPort, id 0x1000002d4, registered, matched, active, busy 0 (40 ms), retain 14> zu finden):
```

Code

1. +-o XHC@14000000 <class AppleIntelCNLUSBXHCI, id 0x1000002b4, registered, matched, active, busy 0 (100 ms), retain 136>

EDIT:

Ich musste die Antwort splitten, weil sie mehr als 10.000 Zeichen hatte. Aber wenn ich den Rest in einer zweiten Antwort posten will, bekomme ich die Meldung:

~~„Die letzte Antwort in diesem Thema stammt bereits von dir, du kannst erst in 86.365 Sekunden erneut auf dieses Thema antworten.“~~

~~Kann da mal wer einen Post mit irgend einer kurzen Zeile dranhängen, damit ich den Rest noch posten kann? Danke!~~

EDIT2:

Hab' das jetzt über einen zweiten Account selbst geregelt - siehe nächster Post. Ich hoffe, das ist für den Zweck okay.
