[Zitat von swissborder](#)

[treblA](#) If it helps, feel free to try my EFI, since I have almost the same hardware configuration as yours...

[macOS Mojave 10.14 Lauffähige Systeme \(EFI-Sammelthread\)](#)

Thanks swissborder....tried your EFI and it install smoothly, my problem now is how to boot via SSD it won't boot if i removed the usb installer...can u give me the instructions on how to boot via the ssd....thanks in advance
