

Clover Bootloader aktuelle und ältere Versionen

Beitrag von „Noir0SX“ vom 10. Juni 2019, 15:08

Catalina Support

Hier dann noch die Version r4961 mit folgenden Neuerungen:

- [4961] the best fakeemc included
- [4960] correct errors in initAnime & initTheme, which may cause hangs in some cases
- [4959] fix logic patch by pmheart, redefine GUID for Reset NVRAM
- [4958] Don't inject REV, EPCI and RBr if REV is zeroed
- [4957] Still tries to inject zeroed smc version, nulling them
- [4956] Mistake of previous commit
- [4955] No injection of REV, RBr RPi keys for iMacPro1,1, Macmini8,1, MacBookAir8,1, and MacBookPro15,1/2
- [4954] update Clovy theme
- [4953] simplify clip-path in Clovy theme
- [4952] secure check for mouse
- [4951] security check for anime
- [4950] correct typo in comments of last commit
- [4949] Adjust inject logic from r4938
- [4948] update Clovy theme with Catalina icon
- [4947] correct string size, thanks to DF
