

# WhateverGreen - Fix für alle Grafikkarten (AMD/Intel & Nvidia)

Beitrag von „Noir0SX“ vom 3. Juli 2019, 15:50

## v1.3.0

- Fixed custom connector support for Radeon GPUs, thx [@lwfitzgerald](#)
- Added `disable-gfx-submit` property to back `ngfxsubmit=0` boot argument
- Added GuC firmware loading patch for latest SKL+ drivers
- Allow loading on 10.15 without `-lilubetaall`
- Disabled NVIDIA performance fix on 10.15, as it now is built-in
- Enable HDMI 2.0 patches on 10.14+ (Use at own risk in case of undiscovered change)
- Added CFL graphics kernel panic workaround on 10.14.4+
- Added infinite loop fix when calculating dividers for Intel HDMI connections on SKL, KBL and CFL platforms.
- Added driver support for onboard LSPCON chips to enable DisplayPort to HDMI 2.0 output on Intel IGPUs (by [@0xFireWolf](#))
