## **macOS Mojave Ozmosis BETA – OZ167X-XMAX**

**Beitrag von „nrchandar0100“ vom 8. Juli 2019, 13:03**

Hi

Thanks i went through the page you referred me and downloaded the Kernext Patcher.plist and placed it in the OZM folder.

But when boot Catalina the apple logo comes and progress bar goes for only one time and struck. By the way you have mentioned about open core project in lieu of ozmosis, i would like to know weather it is going to be modified rom like ozmosis.

Rgards
