

Thunderbolt HOT-PLUG bei Onboard Thunderbolt Chip!

Beitrag von „iGPU“ vom 17. Juli 2019, 16:26

Thanks for reply.

A few months ago, I started a thread on another forum on the ASRock Z390 PhGam ITX mobo. I have not gotten TB3 hot-plugging working. I have seen interaction between the SSDT-TB3, Clover/Arbitrary, and USB Port-kext injection, so it is complicated. But I'm not as clever as you (sigh).
