

[Sammelthread] macOS Catalina 10.15 Dev-Beta Erfahrungen

Beitrag von „Arkturus“ vom 29. Juli 2019, 22:56

dann wäre hier der BCM20702A0 der entsprechende Akteur, der auch erkannt wird. Leider will Catalina damit nichts anfangen.

The screenshot shows the 'USB Controller' and 'USB Anschlüsse' sections of the macOS System Information utility. The 'USB Controller' section lists a 'Sunrise Point-LP USB 3.0 xHCI Controller'. The 'USB Anschlüsse' section is a table with columns for Name, Konnektor, Anschl., Dev Speed, and Gerät. Several rows are highlighted in green, including HS01 (2.4G Keyboard Mouse), HS07 (BCM20702A0), HS10 (Integrated Camera), and SS13 (5 Gbps).

USB Controller:				
Type	Name			
XHC	Sunrise Point-LP USB 3.0 xHCI Controller			
USB Anschlüsse:				
Name	Konnektor	Anschl.	Dev Speed	Gerät
HS01	USB3	0x01	12 Mbps	2.4G Keyboard Mouse
HS02	USB3	0x02	12 Mbps	
HS03	USB3	0x03	Unknown	
HS04	USB3	0x04	Unknown	
HS06	USB3	0x06	Unknown	
HS07	Internal	0x07	12 Mbps	BCM20702A0
HS08	Internal	0x08	Unknown	
HS09	Internal	0x09	Unknown	
HS10	Internal	0x0A	480 Mbps	Integrated Camera
SS13	USB3	0x0D	5 Gbps	
SS15	USB3	0x0F	Unknown	
SS16	USB3	0x10	Unknown	
SS18	USB3	0x12	Unknown	

hier nochmal der aktuelle Clover dazu.
