Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „Roman1“ vom 6. August 2019, 17:01

Try this Clover yet. I have another Gigabyte motherboard, but it contains everything on Catalina.

For audio are needed in Clover / ACPI / origin aml files.

Do you have any?

Or the VoodooHDA 2.9.2 Clover-V14 is already released
