

# WhateverGreen - Fix für alle Grafikkarten (AMD/Intel & Nvidia)

Beitrag von „Noir0SX“ vom 11. August 2019, 14:46

## v1.3.1

- Fixed an issue that LSPCON driver fails to set the mode after the adapter power is off, i.e. sleep/wake up cycle.
- Unified release archive names
- Enforce complete IGPU modeset on Kaby Lake and newer (overridable by igfxfcmsfbs bootarg or complete-modeset-framebuffers device property)
- Disable VRAM testing on AMD GPUs on 10.14.4+ (based on vladie's patch)
