

Lilu - Generic kext patcher (neue Grundlage für diverse Kexte)

Beitrag von „Noir0SX“ vom 11. August 2019, 14:50

v1.3.8

- Compile Xcode 11 OSObject stubs into plugins to allow mixing compilers
- Unified release archive names
- Added multirouting support to routeFunction API enabling functions to have multiple proxies
- Added explicit routing type to routeFunction APIs
- Made Lilu use long function routes to ease third-part multirouting
