

Erledigt

Ruhezustand wird über Nacht unerwartet unterbrochen

Beitrag von „blob810“ vom 13. August 2019, 08:18

Der SleepProxyClient sollte schon deaktiviert sein. Ich habe das mittels Clover RC Script gemacht. Da gibt es eine Funktion Disable Sleep Proxy Client. Zusätzlich habe ich in die mDNSResponder.plist -NoMulticastAdvertisements als Programmparameter eingetragen. Heute Nacht ist er trotzdem wieder 1x aufgewacht.
