[Zitat von Keyssel](#)

OPIPLEX 5050

Intel Core i7 7700

Dell Optiplex 5050

8gb Ram

1tb HDD Western Digital

my computer freezes as soon as it starts running Hakingtosh Sierra

like This

```
(sxAptioFixDrv: Starting overrides for \System\Library\CoreServices\boot.efi) Using  
reloc          block:          yes,          hibernate          wake:          no
```

```
+++++
```

PLEASE HELP
