## Dual Radeon VII (Multi-GPU)

Beitrag von „Shabo“ vom 7. September 2019, 10:06

About Dual Radeon Vii inside the system (x299 18 Core)

I saw no improvement in performance!

We're still in beta

And the Mac Pro 2019 is not out yet

So we want to see what happens after the launch

And of course an update to the FCPX and Adobe Premier software...

Note: I do not understand the language and what I read here is in Google translation 😊
