I understand... Sounds like a bug in DarBoot Driver. If you want to resolve the issue you can contact cecekpawon. Otherwise just use the ROM without DarBoot 😊

😞 have you got email cecekpawon?

P.S. Maby you may create H77DS3H.F10_Rev_1_1-XMAX.rom without darboot and other unnecessary files. And add a athers driver (kest2ffs) Thank you
