ASRock Z77 Pro4 mit OpenCore Bootloader

Beitrag von „panas78“ vom 18. September 2019, 21:44

You can patch the bios so no need to remove AppleIntelCPUPowerManagement.kext

Use uefipatch.exe from here <https://github.com/LongSoft/UEFITool/releases/tag/0.26.0>

on the latest Asrock bios and you are good to go.
