Clover bootloader

Beitrag von „g-force“ vom 6. Oktober 2019, 14:25

If i do understand your problem, you`re stuck at mounting the EFI partition on the USB (shown in the video at 6:00 minutes).

You`re working in a VM - can it access the USB?

As you started out with "insanelymac", why do you ask in a german forum and not the guys at "insanelymac"?
