

Erledigt

Problem mit der GTX560Ti

Beitrag von „marco90ch“ vom 2. März 2013, 17:11

Okay hat geklappt! 😊

Nur kann ich die Dateien mit den Befehlen

```
"cd Desktop  
cp -R NVD* /System/Library/Extensions/"
```

nicht wieder zurück kopieren. Ich kriege dann

Zitat

```
Marcos-Mac-Pro:~ marcobrunori$ cd Desktop  
Marcos-Mac-Pro:Desktop marcobrunori$ cp -R NVD* /System/Library/Extensions/  
cp: /System/Library/Extensions/NVDAGF100Hal.kext: Permission denied  
cp: NVDAGF100Hal.kext: unable to copy extended attributes to  
/System/Library/Extensions/NVDAGF100Hal.kext: Permission denied  
cp: /System/Library/Extensions/NVDAGF100Hal.kext/Contents: No such file or directory  
cp: NVDAGF100Hal.kext/Contents: unable to copy extended attributes to  
/System/Library/Extensions/NVDAGF100Hal.kext/Contents: No such file or directory  
cp: /System/Library/Extensions/NVDAGF100Hal.kext/Contents/_CodeSignature: No such  
file or directory  
cp: NVDAGF100Hal.kext/Contents/_CodeSignature: unable to copy extended attributes  
to /System/Library/Extensions/NVDAGF100Hal.kext/Contents/_CodeSignature: No such  
file or directory  
cp:  
/System/Library/Extensions/NVDAGF100Hal.kext/Contents/_CodeSignature/CodeDirectory:  
No such file or directory  
cp:  
/System/Library/Extensions/NVDAGF100Hal.kext/Contents/_CodeSignature/CodeRequirements:
```

No such file or directory
cp:

Marcos-Mac-Pro:Desktop marcobrunori\$

Alles anzeigen

EDIT: Auch mit sudo klappts nicht...

EDIT: Problem GELÖST! 👍

Lösung: als root im Terminal eingeloggt, dann hats geklappt.

Nachdem ich die CUDA-Treiber runtergeladen hatte, konnte ich mit GraphicsEnabler=yes, PCIRootUID=0 sowie npci=0x2000 erfolgreich booten. Besten Dank an dieser Stelle an alle, besonders an tuxie!
