Catalina C621 Install

Beitrag von „Dazouri" vom 23. Oktober 2019, 14:36

Thanks DSM2 for the response. Yes, I had heard of the "1" user in Germany to get this working. 🙂 And I have come computer in hand to ask for help.

Not sure Linus and Anthony are sure "how" they got their system to boot 🙂   And they have eluded to their many remaining problems at the desktop. I haven't installed any specific drivers.
