Conexant CX20632 Audio läuft nicht unter Mojave

Beitrag von „MacPeet“ vom 27. Oktober 2019, 14:05

[attend](#) and [marcus.l](#)

[attend](#), your codec_dump (HP ProDesk 400 G5 MT) is identical to the codec_dump of the (HP ProDesk 600 G3 MT). The audio codec is the same. Swapping LineOut back and internal speaker was intentional for SwitchMode.

Now:

LayoutID**15**: SwitchMode LineOut back (as internal speaker) with headphone front.

LayoutID**16**: SwitchMode internal speaker with headphone front. LineOut back extra as LineOut.

Input's changed again. Try front Mic now. Also try with pre-amplified mic or the headphone trial.
