

# OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „ellybz“ vom 19. November 2019, 08:00

@ [kanske](#)

See attached my stable & error free config.plist for my GA X299 board. ACPI patches are not needed anymore 😊

Version 0.5.3 (11/16/19)

I'm using OpenCore to boot 4 different OS: Mojave, Catalina, Windows & Linux.

EC on GA X299 is not needed.

Do not forget to add S / N, UUID & remove argument npci = 0x2000, not needed on ASUS.
