Lasst uns basteln: Vorke Notebook 15 (i5-8250U)

Beitrag von „Cucazz“ vom 30. November 2019, 11:22

Hi, I'm new to this forum, I'm Italian (and the google translation is very bad ). I would like to buy this notebook to install hackintosh. Can the network card be replaced with a Broadcom DW1820A? It should be compatible. And could you repeat what problems we haven't managed to fix yet? Thank you very much, it really looks like a great computer quality/price.
